5. Ability to use electronic instruments to improve electronic warfare skills

are awarded with “Certificate of Air Operations Expert”

Duration of Course:

Trainings including theoretical trainings, practices and simulations last 6 weeks in total

Aviation Courses

SADAT A.S. has capability of graduating Fighter Pilots for demanding countries by providing three different courses as “Pilot Training Programme”, “Primary Aircrafts Training Programme” and “Advanced Fighter Pilot Training Programme” for any type of aircrafts and helicopters by its professional teams, whose members, to play active roles as instructors, are experienced pilots retired from Turkish Armed Forces after successfully completing their services.

Pilot Training Programme

SADAT A.S. plans, coordinates and implements the Pilot Trainings at international norms in demanding countries. Pilot Trainings can be specified for special requirements as well. Time Schedules for standard training programmes may differ from 1 year minimum up to 2 years maximum.

Pilot Certifications can be suited for the requirements of countries or trainings can be adapted for countries’ already-thought standards.

Aviation Courses

Primary Aircraft Training Programme

Besides The Attack Crafts Trainings, SADAT A.S. classifies and plans trainings for the pilots, who have successfully completed “Pilot Training Programme” before, to orientate candidates on to different types of aircrafts to be flown. Those aircrafts may be attack crafts, cargo crafts, tanker crafts, AWACS or helicopters. Depending on the Aircraft types already used by the countries or to be purchased in the future, the planning and implementations of aircraft training programmes may be performed inside the country’s territory or in contracted-third partying countries after the worldwide investigations by SADAT A.S.

Advanced Fighter Pilot Training Programme

SADAT A.S. provides Fight Trainings for the pilots, who have successfully completed the Primary Aircraft Training Programme, in countries’ territory if requested. These trainings require long-term duration and can be specialized for the countries’ needs. By evaluating the threat perceptions of countries, the training programmes can be reformed or upgraded if necessary.

Aim of the course, for Islamic and Friendly Countries, is to grow and train military and civilian pilots who are to fly any type of helicopter likely Turkish Pilots who fly all types of military and commercial helicopters and to execute yearly renewal and control flights and to teach new aviation developments.

Trainings Classes Provided

1) Military Pilot Trainings:

- a) Helicopter Pilot Course
- b) Helicopter Type Rating Course
- c) Instrumental Flight Rules (IFR) Course
- d) Night Flight Training (Flying with Night Vision Goggles) Course
- e) Armed Helicopter Flight and Arms Training Course
- f) Mechanics Basic Course
- g) Type Rating Course for Mechanics

2) Civilian Pilot Trainings:

- a) PPL (Private Pilot License) course
- b) CPL (Commercial Pilot License) course
- c) Helicopter Instrumental Course
- d) Helicopter Type Rating Course

Helicopters Types To Be Trained

- Bell-206 JetRanger / LongRanger
- UH-1 / AB-205
- S-70 (UH-60) Blackhawk (Sikorsky)
- AS-532 Cougar
- Enstrom
- AH-1 P (Cobra)
- AH-1 W (Cobra)
- Other Helicopters (Depends on Requests)

Our Instructors

Trainings are given by our qualified and experienced senior instructor pilots and technical teams who have actively served in Aviation Schools of Air Forces and Army of Turkish Armed Forces as instructors and mechanics.

Number of Helicopters, Training Area and Other Issues

Depending on the requested number of pilots (candidates) and requested year for training, it will be clarified through negotiations.
